

FIVE GOOD REASONS
FOR MARTOR
PROMOTIONAL KNIVES.

THE SAFER WAY TO CUT.

martor

FIVE GOOD REASONS
FOR MARTOR
PROMOTIONAL KNIVES.

THE SAFER WAY TO CUT.

martor

LEAVE A LASTING IMPRESSION.

Gifts sustain friendships. Special promotional gifts also nurture relationships. Customer relations.

There are **(at least) five reasons** to recommend MARTOR knives. In this way, our promotional knives help you to advertise your company, your brand or your issue in a likeable and intelligent way.

1. SOMETHING INNOVATIVE.

Your business is not run-of-the-mill. Your customers aren't either. And your promotional gifts? Surprise your customers with a product that is not the norm. A product that is exceptional. **Innovative.**

2. SOMETHING USEFUL.

You'll always benefit from giving away a useful cutting tool. It's something **everyone will need** – sometime, somewhere, somehow. For opening packages, cutting paper or cutting film.

3. SOMETHING SAFE.

Do cut – just don't cut yourself! It's best to give cutting tools **with built-in safety** as gifts. Your customers will notice that you care about their wellbeing.

4. SOMETHING DURABLE.

It will remind customers about you over the long term. A safety knife of such high quality and with your logo means customers will want to use it for **many years** to come.

5. SOMETHING PLEASANT.

Achieve your aim of customer **satisfaction** and sustain relationships over the long term. And your staff appreciate great gifts too...

GIVE AWAY...

... OR EVEN BETTER USE IT YOURSELF!

Note:

This brochure is intentionally written from the perspective of the end customer. The person who will use a knife for advertising purposes, regardless of whether they order it via the well-assorted promotional products retailer or directly from MARTOR.

DISCOVER MARTOR.

Speaking of customer relationships: do we know one another yet? MARTOR is the leading international supplier of safety knives. The headquarters are in Solingen, the city of knives. Our "safety knives" get their name because they are equipped with **reliable safety technologies**.

Our cutting tools are used by well-known companies from industry, retail/logistics and craft trade sectors, e.g. to open **packaging** safely, quickly and **easily**, and to perform other routine cutting tasks. Or for promotional purposes.

If you want to use our professional tools as promotional knives too, a **prominent space on the handle** is reserved for your branding and your message.

INVEST IN LASTING VALUES.

Innovation, usefulness, safety, durability and (overall) satisfaction. Who doesn't want to be identified with these values? Convey them using our cutting tools – with your branding.

Innovative, because as a market and technological leader, we only give you the best. There's no difference between our promotional and professional tools.

Useful, because our practical and ergonomically shaped knives are not only very comfortable to hold, but are also suited to a wide range of cutting materials.

Safe, because our safety technologies effectively protect against cutting injuries.

Durable, because our cutting tools are made of high-quality materials such as aluminium and abrasion-resistant plastic.

And **satisfaction**, because... Just ask delighted customers and employees yourself!

Our safety technologies – presented for you:

SECUMAX: maximum safety thanks to the concealed blade

In these knives, the blade is safely shielded, so doesn't come into contact with the person using it or the boxed goods.

SECUPRO: very high degree of safety thanks to the fully automatic blade retraction

The blade retracts immediately after cutting even if you are still holding the slider or the lever.

SECUNORM: high degree of safety thanks to the automatic blade retraction

As with the fully automatic blade withdrawal, only you need to release the slider or lever during cutting.

We also have other cutting tools such as cutters and special knives (scalpels, deburring tools, scrapers etc.) which are often equipped with manual blade retraction (= basic safety).

LET YOURSELF BE INSPIRED.

To give you a better idea of everything that is possible, here are a couple of examples. Now you just need to use your imagination to replace the lettering there with your own ...

You can find our most popular promotional knives on the following pages, with all the necessary information about printable area, the important features of the knife and much more.

The pictograms for the individual products can be found in the flip-out page at the end of the brochure. Look for this symbol:

Concealed blade

The blade is not open, but concealed, shielded from both people and goods alike. Giving you a maximum degree of safety from cut injuries whilst cleverly protecting your goods.

SECUMAX

SECUMAX 145

NO. 145001.99

Videos

Compact design. Powerful performance.

The SECUMAX 145 is our clever, compact safety knife for routine cutting tasks. The glass-fibre reinforced plastic handle and 0.5 mm strong blade give it remarkable robustness. At just 12 g it is also extremely light. The disposable cutting tool easily copes with single-layer cardboard, film and packing tape, for example. The two cutting edges are safely concealed to protect fingers.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

2-in-1 blade head
The blade head provides two functions: cutting and piercing. Use the knife's noses to the left and right of the blade to effortlessly pierce materials (e.g. card and film), and the blade head's corners for packing tape.

Concealed blade
With a 4 mm blade access, the blade is highly concealed. Out of reach for fingers but accessible to the materials to be cut. And contents under the cutting surface will also be kept safe from contact with the cutting edge.

Flat and robust design
It is not just the handle that has an extremely flat design – the cutting channel too measures just 1.5 mm, requiring less effort for cutting. The tool also retains its strength – thanks to a 0.5 mm blade and high-quality plastic.

Light and easy
The SECUMAX 145 is so lightweight that users will hardly notice it. This is aided by the comfortably rounded handle at just 4 mm wide, and thumbs will intuitively find their place at the ergonomically designed grooves.

Clever guide surfaces
A tip from us on cutting card: hold the blade at an angle to improve cutting! It is no accident that the guide surfaces are located at the front of the knife – they aid cutting at the most effective angle.

SECUMAX 150

NO. 150001.98

Videos

Full points in three regards.

The SECUMAX 150 resolves several issues in one. With its concealed blade, you will never have to worry about injuring yourself or damaging your goods. Thanks to its versatility, you only need the one tool to cut, scrape and split. And with its 24 grams and ergonomic design, the SECUMAX 150 won't weigh you down with fatigue after a day of cutting. In short: it is the cutting tool you have been waiting for.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

3-in-1 blade head
The SECUMAX 150 fits like a glove. It's so comfortable to hold, that it feels like an extension of your hand. With it you can cut cardboard, split tape, open plastic strapping... you can even scrape residue off surfaces.

Concealed blade
This safety knife doesn't need a sharp tip to be a smart knife. The cutting head is flat and relatively small, the two noses on each side have the perfect length to protect, and both cutting edges are wide enough to safely and effortlessly cut 2-ply cardboard.

Clever guide surfaces
Another reason why the SECUMAX 150 can cut through cardboard so easily? The guide surfaces located right at the front of the safety knife help you to cut at an angle. Angled cutting means less material resistance!

No blade change
The SECUMAX 150 is a disposable knife. The blade can neither get lost nor injure you during blade change. When the time has come, you can easily dispose of the SECUMAX 150 with your residual waste.

Ergonomically shaped
Right handed? Left handed? It's really all the same. The SECUMAX 150 fits perfectly in any hand. Gently arched outer edges, coupled with light ribbing and a low weight, ensure an ergonomic experience.

SECUMAX VISICUT

NO. 47012.98

Videos

Your visiting card. With a blade.

As fragile as the SECUMAX VISICUT may appear, it is a really sharp cutting tool. And a popular advertiser too. If you look closely, it is like a business card with an in-built quality blade. So why not also your new business card? Your name, logo and your claim printed on it would always be there when your customers, friends and partners open their letters with it.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

No risk
The SECUMAX VISICUT is a disposable knife with an injected blade. That's reassuring. Your customers will not come into contact with it, neither when they are cutting or at a blade change because there isn't one.

Large surface
It's not just the surface of the cutting tool required for safe guiding that is large. So too is the space for your advertising message which is then sure to have the required impact.

Long, pointed nose
Why the extra long and pointed nose in the SECUMAX VISICUT? Because you can place it particularly well in the spaces in between. The cutting material is also led to the blade in a much more reliable way.

For any hand
The SECUMAX VISICUT is lightweight and practical. It is so practical that you will enjoy working longer with it no matter whether you are right or left handed – because this cutting tool is always the perfect match.

Ideally placed
An eyelet on the SECUMAX VISICUT means it can always be kept in an easy to find place. It also fits in any wallet – just like a real business card.

SECUMAX POLYCUT

NO. 8500012.98

The all-rounder among specialists.

The SECUMAX POLYCUT is another of our small, plastic disposable knives and is special by being an all-rounder. The larger gap between the blade and plastic means it can cut through multiple layers of material. Furthermore, with its long pointed nose you are able to cut your way through envelopes, between paper rolls and through layers of film. Its slender design also enables it to be used in tight spaces.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

It's all protected

The quality blade is safely embedded between the nose and the handle. So it only cuts what you really want to cut. And there is no risk to your goods while doing so.

Singularly good

The SECUMAX POLYCUT is a disposable knife. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

Long, pointed nose

Why the extra long and pointed nose in the SECUMAX POLYCUT? Because you can place it particularly well in the spaces in between. The cutting material is also led to the blade in a much more reliable way.

For any hand

The SECUMAX POLYCUT is small, light and handy. So handy that you can gladly work longer with it. It doesn't matter whether you are right or left-handed, because this cutting tool always fits.

Ideally placed

You won't misplace the SECUMAX POLYCUT so easily. The safety knife is equipped with an eyelet so it can be kept in an easy to find place.

SECUMAX TRENNEX

NO. 6200012.98

Videos

Slices anything that's soft.

The SECUMAX TRENNEX is a disposable knife made of a stable plastic. It'll efficiently cut an array of different materials, but does prefer to work with those of a softer substance. Foam, pipe insulations, perforated film and coarsely meshed textiles are all materials the SECUMAX TRENNEX loves to cut. The tip of its nose is significantly rounded. This prevents hooking and tripping. Minor detail, major effect.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

Double protection
You will only cut what you really want to cut with the moulded-in blade. That means neither yourself nor anything coming under the area of "cutting material."

Rounded off nose
The long rounded nose compresses the material to be cut and guides it safely through to the blade. This avoids snagging and, more importantly, cutting yourself.

Singularly good
The SECUMAX TRENNEX is a disposable knife. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

For any hand
The SECUMAX TRENNEX is small, light and handy. So handy that you can gladly work longer with it. It doesn't matter whether you are right or left-handed, because this cutting tool always fits.

SECUMAX PLASTICUT NO. 46912.98

Videos

Capable of cutting multiple layers.

The SECUMAX PLASTICUT is different from the other products in our range but only in the detail. But you know: that's what often matters most. Thanks to the generous gap between blade and plastic, the safety knife copes with, for example, film and paper in multiple layers. Due to its width of 3 mm, cutting curves and cutting in tight spaces is also possible. By the way, until its facelift this cutting tool was called the SECUMAX POLYPICK.

It's all protected

The quality blade is safely embedded between the nose and the handle. So it only cuts what you really want to cut. And there is no risk to your goods while doing so.

Nose for piercing

You will not put away the SECUMAX PLASTICUT so easily. That's because it is comfortable, light and handy. It has a slightly raised and pointed nose and is therefore ideal for piercing into the material to be cut.

Singularly good

The SECUMAX PLASTICUT is a disposable knife. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

Ideally placed

You won't misplace the SECUMAX PLASTICUT so easily. The safety knife is equipped with an eyelet so it can be kept in an easy to find place.

SECUMAX PLASTICUT

NO. 346912.98

Videos

Capable of cutting multiple layers. Stainless steel.

The SECUMAX PLASTICUT is different from the other products in our range but only in the detail. But you know: that's what often matters most. Thanks to the generous gap between blade and plastic, the safety knife copes with, for example, film and paper in multiple layers. Due to its width of 3 mm, cutting curves and cutting in tight spaces is also possible. The blade is made of stainless steel and the cutting edge is TiN-coated.

It's all protected
The quality blade is safely embedded between the nose and the handle. So it only cuts what you really want to cut. And there is no risk to your goods while doing so.

Nose for piercing
You will not put away the SECUMAX PLASTICUT so easily. That's because it is comfortable, light and handy. It has a slightly raised and pointed nose and is therefore ideal for piercing into the material to be cut.

Stainless steel blade
Not all film knives are equipped with rust-free blades. The SECUMAX PLASTICUT is an exception. What's more: its cutting edge is TiN-coated as well. Both aspects increase the value and durability of your cutting tool.

Singularly good
The SECUMAX PLASTICUT is a disposable knife. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

Ideally placed
You won't misplace the SECUMAX PLASTICUT so easily. The safety knife is equipped with an eyelet so it can be kept in an easy to find place.

SECUMAX CARDYCUT

NO. 546922.98

Videos

Ventures where others won't. White and rust-free.

The SECUMAX CARDYCUT in white is also particularly popular as a personally printed promotional knife. Its compact design and short nose makes it extremely easy to use – for example, for curved cuts and cutting in especially narrow gaps. As a specialist for cutting thin, single-layer film it is often used, for example, in the automotive industry.

SECUMAX 320

NO. 32000112.92

Videos

COMBI reloaded. The new generation.

The SECUMAX COMBI was always in a class of its own as a film cutting expert – until it found its legitimate successor. The new SECUMAX 320 makes an instant impression with its outstanding design. And if you look more closely, you will appreciate its inner values. For example, in comparison to its predecessor, the perfected ergonomics and the completely overhauled blade change. What about the subject of "the highest level of work safety"? It has always been in the COMBI's DNA – and so it will remain that way.

Main cutting materials

Application

Safety first
The concealed blade and rounded nose reliably protect you and your products. Furthermore, the knife head has been significantly strengthened making it more robust and longer lasting.

Blade change made easy
Another benefit for handling and safety is the newly designed blade change. Simply lift up the blade change button and remove the cover. You can then directly access the 4-cutting edge blade.

Perfect ergonomics
Can you feel the difference? The new handle shape with the finger friendly contours fits like a glove. The preset cutting angle is also kind to the hand and arm helping you to position the knife for cutting.

Optimised blade area
Just two examples: The cutting channel is formed so that your safety knife moves away the freshly cut material even faster. Diagonal cuts are also easier than ever to perform. Your benefits: Less effort required for the task.

Two splitting depths
When splitting tape, you now have a choice of depth between 5 mm and 3.5 mm for even more goods protection. Just open the handle, turn around the splitter, finished. Working with the splitter is just as uncomplicated. Pierce the tape and away you go.

SECUMAX 350

NO. 350001.92

Videos

More fun while you work? Try it out.

The SECUMAX 350 is a combination of versatility, comfort and safety. A maximum degree of safety. Featuring an innovative blade change, this knife is multi-talented. It can be used to cut all standard materials, from film to plastic-strap-ping, from paper to 2-ply cardboard. It splits adhesive tape easily too. And it is so comfortable to hold that you won't want to put it down.

2-in-1 blade head
Double function, double use: with two cutting edges and two tape splitters, this multifunctional blade head exceeds itself. Before you need to change the blade, flip it over once to use the second side.

Concealed blade
The SECUMAX 350 is a smart safety knife. It's fitted with a double-sided overmoulded blade, the noses have the perfect length to protect. The two cutting edges are wide enough to safely and effortlessly cut 2-ply cardboard.

Spare blade in storage
Blade change is easily and safely executed. Look for the arrow and follow its lead. Open the blue inner side of the knife to reveal the spare blade. The mounted blade will simultaneously unlatch.

Light and easy
A cutting heavyweight, but with only 37 grams, this knife is rather lightweight. Meaning that even high cutting frequencies won't weigh you down. There's no need to stress when handling the blade either: a plastic jacket protects your fingers.

Ergonomically shaped
Right handed or left handed? It's really all the same. The SECUMAX 350 fits perfectly in any hand. Gently arched outer edges, coupled with suitably located soft grip and light ribbing make for an ergonomic experience.

SECUMAX EASYSAFE

NO. 121001.92

Videos

It's all easy. It's all safe.

The SECUMAX EASYSAFE convinces with its special features. The prominent and pointed nose of the cutting tool easily pierces plastic sacks and film-wrapped pallets. The concealed blade easily cuts the sacks and film. An integrated material guide makes it easier to cut thin film and paper sheets; even single layers won't jam. What about thin textiles or plastic strapping band? Not a problem for the concealed blade.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

For people and goods
The concealed blade provides reliable protection to you and your goods. And your company? It benefits too, naturally. Productivity is high when everything goes smoothly.

Ergonomic handle
Your cutting tool never leaves your hand? Then it is even more important that it is as comfortable as possible, and that it causes as little fatigue as possible. The ergonomic handle is designed with you in mind.

Lockable blade
This safety knife is lockable. With a specially shaped key, you can lock it, and thereby prohibit blade change. This is a particularly interesting feature for all sensitive work places.

For packaging tape
You might be wondering what the small metal plate on the top side of the SECUMAX EASYSAFE does... Try it out! Set the plate against the tape of a taped box, apply enough pressure to pierce the tape, and slice!

4-cutting edge blade
Why do you benefit more from your blade? With its four sharp edges, it can be rotated four times. That's why. The result? Blade life is quadrupled and you stay sharp for longer.

SECUMAX SOS-CUTTER

NO. 537.98

At your side in an emergency.

Safety belts are important for survival. They can however be a hindrance in the aftermath of an accident. They can trap injured people in dangerous situations. The SECUMAX SOS-CUTTER provides the perfect solution. You can use it to reliably cut through any safety belt, whether as a doctor, paramedic or accident witness. The safety knife is also suitable for cutting through clothing, which in some cases also has to be removed.

Handy shape

You can work with the SECUMAX SOS-CUTTER particularly effectively if you put a finger through the opening. Or, on the other hand, you can push comfortably supported by the flat design and the rounded edges.

Practical eyelet

The SECUMAX SOS-CUTTER is just as much a part of your vehicle as the first-aid set. Your safety knife has an eyelet for attaching so that it is handy in emergencies.

Perfect place

As an alternative, you can attach the safety knife using the integrated velcro fastener. On the dashboard, for example. That makes it available quickly without it "flying around" in the vehicle.

Installed blade

The blade is moulded into the body of the knife and cannot be changed. Blade thickness 0.30 mm.

Fully automatic blade retraction

The intelligent cutting tool: as soon as the blade leaves the cutting material, it withdraws fully automatically into the handle - without you having to do anything. That's what we call "a very high degree of safety".

SECURPRO

SECUPRO MAXISAFE

NO. 10139912.92

Videos

Perfect handling – from every side.

The SECUPRO MAXISAFE has been making an impression for more than 15 years due to its lightness and wide range of applications. The safety knife has now reached new levels of ergonomic design. Just hold the 3-sided slider in your hand and try it out ... notice the difference? And it still has all the tried and tested features – such as fully automated blade retraction and a robust handle made from high-quality plastic.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

Ergonomic handle

The plastic handle now sits even better in the hand thanks mainly to the new shape of the knife's back. The slider and blade change button have also been improved for efficient operation..

3-sided slider

From the right? From the left? From above? Regardless of how you want to activate the blade, all options are available with the SECUPRO MAXISAFE. What's more, the 3-sided slider is now grooved for better grip.

At the press of a button

Your two hands alone are enough to change the blade. And these short instructions: press the blade change button and swing open the handle. Push the blade carrier to the front and you can change the blade. It's that easy.

Metal guard

SECUPRO MAXISAFE is not afraid of a little friction. A metal abrasion protection shield, found on the underside of the knife head, works to prevent any general wear and tear as you cut your path through the day.

2-cutting edge blade

Don't change your blade the moment the tip turns blunt. Double the usage time of your blades and minimize wastage by always remembering to flip them over. Don't forget: there are two sides to every blade!

SECUPRO MERAK

NO. 124001.92

Videos

Safety, comfort? Everything under (lockable) control!

The SECUPRO MERAK is our practical squeeze-grip safety knife with fully automatic blade retraction. With SECUPRO MARTEGO's "little brother" we have thought about one thing in particular: you. The lightweight and user friendly SECUPRO MERAK lets you work safely, with little risk of cutting exhaustion. And there's much more: thanks to a shallow cutting depth, your goods are also well protected. No matter what material you cut.

Application

Ergonomic form

Whether with the right hand or the left hand: you will use the SECUPRO MERAK gladly and effectively. The safety knife is shaped with ergonomics in mind, and the force required to activate and release the lever is appropriately minimal, even at high cutting frequencies.

Safe blade change

You can change your blade without any additional tools, and without dismantling the SECUPRO MERAK. You have nothing to lose: an integrated magnet prevents the blade from falling out.

Light and stable

A particularly abrasion resistant plastic has been used for the SECUPRO MERAK. Nevertheless, it has a comfortable weight. Your cutting arm is protected from fatigue, and your safety knife from wear and tear.

Press for safety

You can prevent unintentional blade activity by activating the small blue blade lock. Simply press against the pictured lock to protect yourself from injury whenever your safety knife is stationary.

4-cutting edge blade

One blade, four sharp edges. You clearly get more out of your blade; four times more in fact. Rotating the blade allows you to cut with a constant cutting force, all the way through your work day.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

Perfect handling

The advantages of the SECUPRO MARTEGO lie in your hands. The ergonomic squeeze-grip, the soft grip for better handling, the "pre-set" cutting edge; these three factors guarantee an ergonomic experience.

Change safely

When you need to change the blade, you can do so without any additional tools. Here, the "attraction" of the SECUPRO MARTEGO is revealed: the integrated magnet ensures that the blade cannot fall out.

Everything under control

It's all about aluminium. The powder-coated metal body does not only contribute to the SECUPRO MARTEGO's extraordinary design. It credits the safety knife with extreme robustness and durability.

Blade lock for extra protection

Your SECUPRO MARTEGO accompanies you on your job at every cut and turn? Glad to hear it. But always press the blue blade lock when you've finished cutting! This way the blade cannot make a surprise appearance.

4-cutting edge blade

The Solingen quality blade, with its four sharp edges, can be rotated multiple times. It's worth it! In the meantime, a relatively small cutting depth protects your goods from unnecessary damage.

SECUPRO 625

NO. 625001.92

Videos

Long lever. Long blade. Long-lasting enjoyment.
With rounded-tip trapezoid blade.

The SECUPRO 625 is at the forefront of our ergonomic squeeze-grip knives. Its aspiration is very clear: premium. Because it offers all that professional users require: an aluminium handle, an easy and smooth lever to release the blade, a large cutting depth combined with a very high safety due to the fully automatic blade retraction and a comfortable blade change. All in all, you will know that you have a high-end cutting tool in your hands.

Main cutting materials

Application

Excellent ergonomics
 We have rarely produced a cutting tool before that fits so perfectly into the heavy users hand as the SECUPRO 625. The long and smooth lever, the round shape of the handle and the soft grip at the back of the knife – it's more than worth testing it!

Robust and balanced
 You can see and feel that the handle is made of high-quality aluminium. Its robust construction goes hand in hand with an optimal weight distribution. Consequently, there's almost no risk of weakening for tool and user. Not even when cutting very heavily.

Large cutting depth
 The long blade extension is ideal for cutting up to 3-ply cardboard boxes, rubber, material on reels and many more applications. The blade can be changed in a few steps – by operating the blade change button and pressing the lever, it can be easily pulled out.

For many cutting types
 The overall package of the SECUPRO 625 is quite unique – and so are all separate features. Even saw cutting is safe – thanks to the protecting blade retraction. And you can enlarge the number of different application areas by simply installing one of the optional blades.

Safe along the line
 While you rely on the blade retraction at the front part of the handle, there's another safety feature built in for even more protection. You can lock the lever and thus avoid that the blade is released unintentionally.

Automatic blade retraction

Thumbs up for a high degree of safety. As soon as you start cutting, remove your thumb from the slider. The blade will disappear into the handle the moment it loses contact with the material being cut.

SECUNORM

SECUNORM SMARTCUT

NO. 110000.99

Yes, a cutting tool can be this SMART.

Make one cut with this safety knife and you'll know immediately why it's called a SMART cut. Its light and compact shape is SMART. The fact that it is suitable for almost all types of cutting material is SMART. Automatic blade retraction in such a small housing is SMART. Its immense popularity as an attractive promotional knife definitely proves its SMARTness.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

One use, two advantages
The SECUNORM SMARTCUT is a disposable safety knife. For you, that means: no risk of injury when changing the blade. The blade will also not get lost in the production process.

Slider on both sides
With the right hand? With the left hand? This question does not arise. Because we have fitted the SECUNORM SMARTCUT with a slider that is accessible from both sides. Choose for yourself!

Light and easy
At only 17 g, the SECUNORM SMARTCUT is a genuine light weight. This also contributes to quick and efficient cutting. Without hands and arms getting tired.

Perfect handling
The product does not only look handy. Its small, rounded handle really sits comfortably in your hand. And there's much more: So that your thumb doesn't slip, the slider has grooves.

You can't lose it
As compact as the SECUNORM SMARTCUT is – there is an eyelet for tethering the safety knife to you or the work station.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

Ergonomic handle
MARTOR wants to make your work easier for you, which is why we always have ergonomics in mind. With its small size and rounded off end, there's nothing uncomfortable about this knife. A grooved slider offers grip for even better handling.

Easy blade change
Once again we've improved blade change. Simply press the blade change button and pull to open the handle. The slider automatically folds up, revealing the blade. Rotate or change and continue cutting.

Double-sided slider
The SECUNORM 175 is user friendly in the best sense of the word. And with its double sided slider, it is suitable for both, right and left handed users. No modification required.

Practical eyelet
A cutting tool as handy as the SECUNORM 175 fits in your pocket. Mostly! To make your safety knife available even faster, you can pull a strap through the eyelet. And hang it around your wrist, for example.

4-cutting edge blade
Why do you benefit more from your blade? With its four sharp edges, it can be rotated four times. That's why. The result? Blade life is quadrupled and you stay sharp for longer.

SECUNORM HANDY NO. 445.19

A classic, in pocket form.

The SECUNORM HANDY is compact, but don't be fooled! Being handy doesn't mean it's quaint. This is a cutting tool with "bite" and all the qualities required for the job. Compact yet versatile, lightweight but extremely handy, the SECUNORM HANDY is suitable for a variety of cutting applications. High frequency cutting is no problem.

Double-sided slider
With the right hand? With the left hand? It's all the same. We have fitted the SECUNORM HANDY with a slider that is accessible from both sides. Now that's handy!

Small, but robust
Don't take this safety knife at face value. It is small, but it is tough. The plastic insert sits snug within a coated metal handle. Light and compact, the SECUNORM HANDY will guide you through thick and thin, long term.

Handy format
The SECUNORM HANDY can slip into every pocket. For times when it's not in use. When in use, you will appreciate its lightness and size. Ribbing on the slider is a grippy bonus.

Tool-less blade change
Changing the blade is simple. And tool-less. Simply pull the plastic insert out of the handle. Rotate or change the blade, replace the insert, job done!

4-cutting edge blade
Why do you benefit more from your blade? With its four sharp edges, it can be rotated four times. That's why. The result? Blade life is quadrupled and you stay sharp for longer.

SECUNORM 300

NO. 30000412.92

Videos

Surprisingly light. Convincingly good.

The SECUNORM 300 is the SECUNORM 500's "little brother" and a further development of the SECUNORM PROFI LIGHT. It retains a pleasant lightness as well as the proven automatic blade retraction. You'll discover much more in the optimised SECUNORM 300 all-rounder. For example, the especially ergonomic design, an increased cutting depth, the new soft grip, and extremely user-friendly blade changing.

Ergonomic handle
The excellent ergonomics can be felt all over the SECUNORM 300, for example in the newly shaped handle which fits comfortably into the hand. Or in details such as the nicely rounded knife end or the non-slip soft grip on the slider.

Pleasantly light
Like its predecessor, the SECUNORM 300 also impresses with its lightness. For just 52 grams you get a comfortable and versatile professional cutting tool.

Abrasion resistant
The SECUNORM 300 is made of a glass fibre reinforced plastic, making it particularly abrasion resistant. Your safety knife therefore stays in top form even when in heavy contact with the cutting material.

Increased cutting depth
The increased cutting depth further expands the range of applications. Even frequent cutting is easy – another benefit of the new design with its outstanding ergonomics.

Optimal blade changing
Just pressing the blade change button allows you to remove the plastic insert with the blade. The click-in blade cover and integrated magnet make blade changing even easier and safer.

SECUNORM MIZAR

NO. 125001.92

Videos

More leverage, more performance.

The slimline SECUNORM MIZAR is your gateway into our world of quality squeeze-grip knives. Instead of a slider, a lever is responsible for releasing the blade. Squeeze and cut. Thanks to a relatively large cutting depth, you can use this safety knife to cut all common cutting materials. Efficiently. Its slender, no-fuss form, simultaneously allows a wide variety of cutting styles.

Application

Ergonomically shaped
Right-handed? Left-handed? It makes no difference with the SECUNORM MIZAR. Its ergonomically designed, lockable squeeze grip comfortably fits all hands. Making cutting super easy. Regardless of the number of cuts you make per day.

Plastic with a content
A glass fibre content, to be precise. These fibres are what make the SECUNORM MIZAR super strong and super solid. The durability of this safety knife is remarkable.

Easy blade change
No tools are needed to change the blade. Two hands can do the job. Move the 3-in-1 safety lock to position "blade change". Swing out the lever, flip the blade cover, replace the blade. Close the cover, store the lever, continue cutting!

Multipurpose locking function
The SECUNORM MIZAR 3-in-1 safety lock is unique. Slide it to lock and unlock your cutting tool. And when necessary, move it to position 3 to safely change or rotate the blade.

2-cutting edge blade
Before you need to change the quality blade, you have the chance to turn it over once. Usage time of the blade is doubled and fatigue is held at bay: with a simple flip of the blade, your product will cut like new.

SECUNORM 500

NO. 50000412.92

Videos

The safety knife.

Over 40 years ago the SECUNORM PROFI set standards in safety, robustness and ergonomics. Its successor goes several steps further. For example, the new aluminium handle significantly improves handling and makes cutting easier, the new slider can be operated from both sides and the blade change has been made so much simpler. Apart from these improvements, the proven automatic blade retraction will continue to protect you from cutting injuries.

Application

Ergonomic handle
The excellent ergonomics can be felt all over the SECUNORM 500, for example in the newly shaped handle which fits comfortably into the hand. Or in details such as the nicely rounded knife end or the non-slip soft grip on the slider.

Abrasion resistant
The robust aluminium handle is designed for the most demanding and frequent cutting tasks. Like its popular predecessor, it is a tough all-rounder capable of taking on any cutting challenge.

Double-sided slider
With the predecessor, the SECUNORM PROFI, there were both left and right handed models. With the modern successor, anyone can cut effectively – with the ability to change hands when the task requires it.

Tool-less blade change
Blade changing without tools. The SECUNORM 500 comes with an intuitively operated blade change button. Press once to remove the blade carrier with its securely held blade.

Blade changing made easy
The blade cover remains in the required position when opened. The blade is then easy to access and is removed using the bladeless edge, minimising the risk of injury.

SECUNORM 525

NO. 52500412.92

Videos

A versatile tool – with great qualities.

The SECUNORM 525 is a straightforward safety knife in every way. The ergonomic aluminium handle sits firmly and comfortably in the hand. Its robust design and large cutting depth of up to 21 mm means the SECUNORM 525 easily manages a variety of cutting materials, for example 3-ply cardboard. An unobstructed view of the blade also allows you to cut particularly precisely. In every task, the proven automatic blade retraction protects you from cutting injuries.

PRODUCT FEATURES

Technical features

Main cutting materials

Application

Robust handle
The aluminium handle is already familiar from the SECUNORM PROFI25. The handle and a newly developed plastic insert form a perfect team to ensure that your SECUNORM 525 is equipped to meet even the toughest tasks.

Optimised slider
A firm hold and grip are typical MARTOR characteristics. The SECUNORM 525 is no different. Its slider has a grooved structure and is especially large giving the ideal conditions for comfortable, "hands-on" work – even when wearing gloves.

Safe blade changing
The blade change button gives easy access to the blade, which is also held in place by a magnet. A further practical feature is that the blade cover can be lifted and locked in an open position.

Large cutting depth
The large cutting depth is ideal for thicker cardboard, material off a roll, rubber and much more. But the SECUNORM 525 is not only very versatile, it can also be relied on for high frequency cutting tasks.

Secure hold
For secure fastening, the SECUNORM 525 is equipped with a practical lanyard hole, another reason why it could become a constant companion. You then reduce risks two-fold: the risk of loss and the risk of cutting injuries.

Our ARGENTAX family contains all of the cutting tools that you know as cutters. You can almost always regulate the cutting depth and the blade retraction manually.

ARGENTAX

ARGENTAX CUTTEX 9 MM

NO. 46100.98

Classic cutter. With a 9 mm snap-off blade.

Sharp, small, handy - the ARGENTAX CUTTEX 9 MM with a narrow snap-off blade includes all the properties you would expect from a cutter. Ideal for easy cutting of cardboard boxes, cardboard, paper and adhesive tape. The long, rounded off handle fits very well in your hand while doing so. You can vary the blade extension as you wish. But, be careful: it's better not to extend the blade out completely when you are cutting.

Small, light, handy
The list could be continued endlessly. That's why the long plastic handle is rounded off at many points to make handling it even more pleasant and comfortable for you.

Easy blade changing
Your own two hands are enough to assist you. Just pull off the cap at the end of the handle, press the slider downwards and finally towards the back and out of the handle. Remove the blade. Done.

Adjusts well
Cardboard box, cardboard, paper? It's all the same. You can flexibly adapt your cutter to the respective conditions with the adjustable blade extension. Don't overstress the snap-off blade while doing so.

Help when breaking off
Once your blade is worn out, just break off the segment at the very front. The notch at the end of the handle will help you break it off.

Practical pocket clip
It's good to have a useful helper such as the ARGENTAX CUTTEX 9 MM at hand, fast. You can attach it to your shirt or trouser pocket with the pocket clip and then you just have to reach out.

ARGENTAX CUTTEX 18 MM

NO. 46200.98

Classic cutter. With an 18 mm snap-off blade.

If you are looking for a mature cutter with a variable blade extension, the ARGENTAX CUTTEX 18 MM with a wide snap-off blade is a very good choice. Just like its narrow "brother," the ARGENTAX CUTTEX 9 MM, it fits very well into your hand. But it is not just useful for cutting cardboard boxes, cardboard or paper, but also adhesive and other types of tape. But be careful: it's better not to use a completely extended blade!

90% of original size

Light and handy

The light plastic handle is ergonomically shaped. This means that it is rounded off at many points to make handling even more pleasant and comfortable for you.

Easy blade changing

Your own two hands are enough to assist you. Just pull off the cap at the end of the handle, press the slider downwards and finally towards the back and out of the handle. Remove the blade. Done.

Adjusts well

Cardboard box, cardboard, paper? It's all the same. You can flexibly adapt your cutter to the respective conditions with the adjustable blade extension. Don't overstress the snap-off blade while doing so.

With a snap-off aid

Once your blade is worn out, just break off the segment at the very front. The notch at the end of the handle will help you break it off.

Practical pocket clip

It's good to have a useful helper such as the ARGENTAX CUTTEX 18 MM at hand, fast. You can attach it to your shirt or trouser pocket with the pocket clip and then you just have to reach out.

ARGENTAX RAPID

NO. 594.98

Two blades, one goal: silicon.

The ARGENTAX RAPID has found its purpose: silicon cartridges. It has two blades to deal with them. One small pointed one, that you can use to scratch and cut open the plug. And a rectangular one which caps the spout opening like a guillotine according to the thickness you require. Nothing can then come in the way of your actual work, such as renewing joints.

Two functions
Ever had problems with a silicon cartridge? First of all, with the closed plug? And right after that, the spout opening, that is too narrow? The ARGENTAX RAPID can provide first class cutting in both cases.

For left and right handers
It makes no difference whether you are left or right handed when using the ARGENTAX RAPID. You will always work with the same precision. Any hand can take care of the ARGENTAX RAPID.

Practical eyelet
You won't have to do without it in this special cutting tool: the practical eyelet for attaching. So you can hang up the ARGENTAX RAPID safely, and always find it again.

Safe when you are on the go
The cutter has a protective cap to ensure that personal transporting is safe. It covers the pointed blade. The sharp edges of the second blade are best stored in the handle.

Installed blades

The blades cannot be changed.
POINTED BLADE: Blade thickness 0.30 mm.
INDUSTRIAL BLADE: Blade thickness 0.50 mm.

Labels and stickers, paint and varnish residues, adhesives, etc. always land up where they're not wanted, e.g. on the floor, the wall or a work surface. Not a problem for a professional scraper from MARTOR.

SCRAPEX

SCRAPEX CLEANY

NO. 544.98

What it does? Clean work.

Labels on the floor? Remains of materials tightly stuck? You can easily clean all smooth surfaces with the SCRAPEX CLEANY. The handy scraper is made of plastic. You can push its blade out of the handle with the practical slider, and after use, push it back in again to store it safely. Blade changing is also as easy as pie.

Good handling

The end of the handle is rounded so that it doesn't press into your hand. The grooves on the slide and in the front handle area also make your work easier. And the integrated blade magazine is comfortable too.

Transport safely

You don't just release the blade with the slide but also pull it back into the handle. It remains tight and safe there - so that you can transport your cutting tool without any problems.

Easy blade changing

Changing blades is possible without tools. You press the slider as far as possible to the front with your hand and release the blade in this way. Now you can push it out to the side.

Practical eyelet

You do not have to do without the eyelet with the SCRAPEX CLEANY. You can just pull a strap through it and hang up the scraper wherever you need it.

For right and left

The SCRAPEX CLEANY fits into every hand, no matter whether it's your right or left hand. Because the handle has been shaped in such a balanced way that no type of handling is preferred or neglected.

SCRAPEX ARGENTAX

NO. 46144.92

Top forming, top form.

It really feels good, the large, rounded handle of the SCRAPEX ARGENTAX. But even the performance of this classic scraper convinces. So you can free all smooth surfaces from residue and remains with it - no matter whether at work or at home. When you're done, push the protective cap over the blade, and everything is safe.

70% of original size

Especially ergonomic
Ergonomics is not the exception with us, but the rule. Even a scraper like the SCRAPEX ARGENTAX waits for you with a rounded handle, which you would gladly also hold for longer in your hand.

Large blade extension
There is comparatively a lot of blade available for a scraper. The advantage: You can reach between the surface and remains of the glue much more easily and can then remove it much more easily too.

Flexible to use
The SCRAPEX ARGENTAX is very suitable for flat scraping angles. So you can depend on your scraper even in difficult situations.

For right and left
The SCRAPEX ARGENTAX fits into every hand. No matter whether it's your right or your left hand. Because the handle has been shaped in such a balanced way, that no type of handling is preferred or neglected.

Easy blade changing
And that completely without a tool: you just have to push the blade to the side and take it out.
